

Property Risk Excess of Loss Reinsurance

Course Description

The Course explains Risk Excess of Loss Reinsurance as used in the International Reinsurance Market, and discusses the reasons why this type of reinsurance is purchased. It will provide a description of London market practice, examine some major wordings considerations and provide an introduction to rating methods and issues.

Target Audience

This course is designed principally for delegates who already have a basic knowledge of the subject matter or who are involved with direct insurance and looking to develop a better working knowledge of property reinsurance.

Course Objectives

At the end of the day attendees will understand the functions and operation of Property Risk and Catastrophe Excess of Loss Reinsurance, including principal operating clauses, their purposes and application.

Course Format

This will be a participative course, with a mixture of tuition and guidance together with practical exercises. Delegates will be encouraged to actively participate in the course through discussion with the course leader and the other attendees.

Trainer Andy Chilton

Andrew Chilton is a member of the Chartered Insurance Institute and a Registered Insurance Broker and provides reinsurance consultancy and technical training services for various companies and organisations within the U.K. reinsurance industry and overseas. Before the establishment of A.C.E.T. Consulting, he was an Executive Director with the Willis Group, where over a period of 30 years he gained considerable experience in various divisions of that Group. This involved the processing and managing the servicing of world-wide Marine, Non-Marine and Aviation reinsurance business on both a proportional and non-proportional basis in the London and International reinsurance markets. He specialised in non-marine North American business for a number of years, before assuming responsibility for technical training for Willis, designing and delivering presentations in the U.K. and overseas and advising on technical reinsurance issues.
